

ATV JORD OG GRUNDVAND

Undersøgelsesmetoder i praksis

10-09-2026

Formål med dagen:

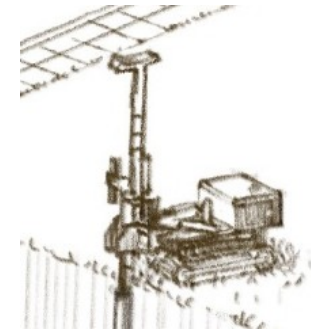

at få et bedre indblik i hvordan (felt)data tilvejebringes

- hvad er der i værktøjskassen?
- hvad er faldgruber?
- hvilke kritiske spørgsmål skal jeg stille, når data overrasker?

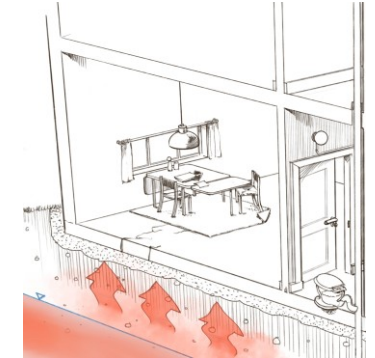

Og så skal vi have det sjovt 😊

Program

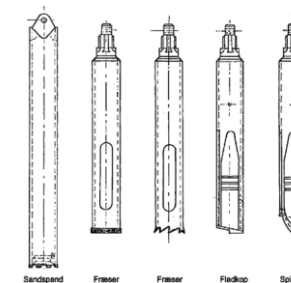

- 10.00** **Introduktion til dagen og forureningssituationen på lokaliteten,** v. Nina Tuxen, Region Hovedstaden
- 10.20** **Station 1**
- 11.25** **Station 2**
- 12.25** **Frokost**
- 13.10** **Station 3**
- 14.15** **Station 4**
- 15.20** **Sammenhæng mellem metodevalg, datakvalitet og tolkning**
v. Klaus Mosthaf, DTU Sustain og Louise Rosenberg, Region H
- 15.45** **Afrunding** v. Isak Hjort Dahm, DGE
- 15.55 -** **Afterparty**

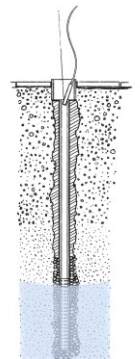

Geoprobe mm

Indeluft mm

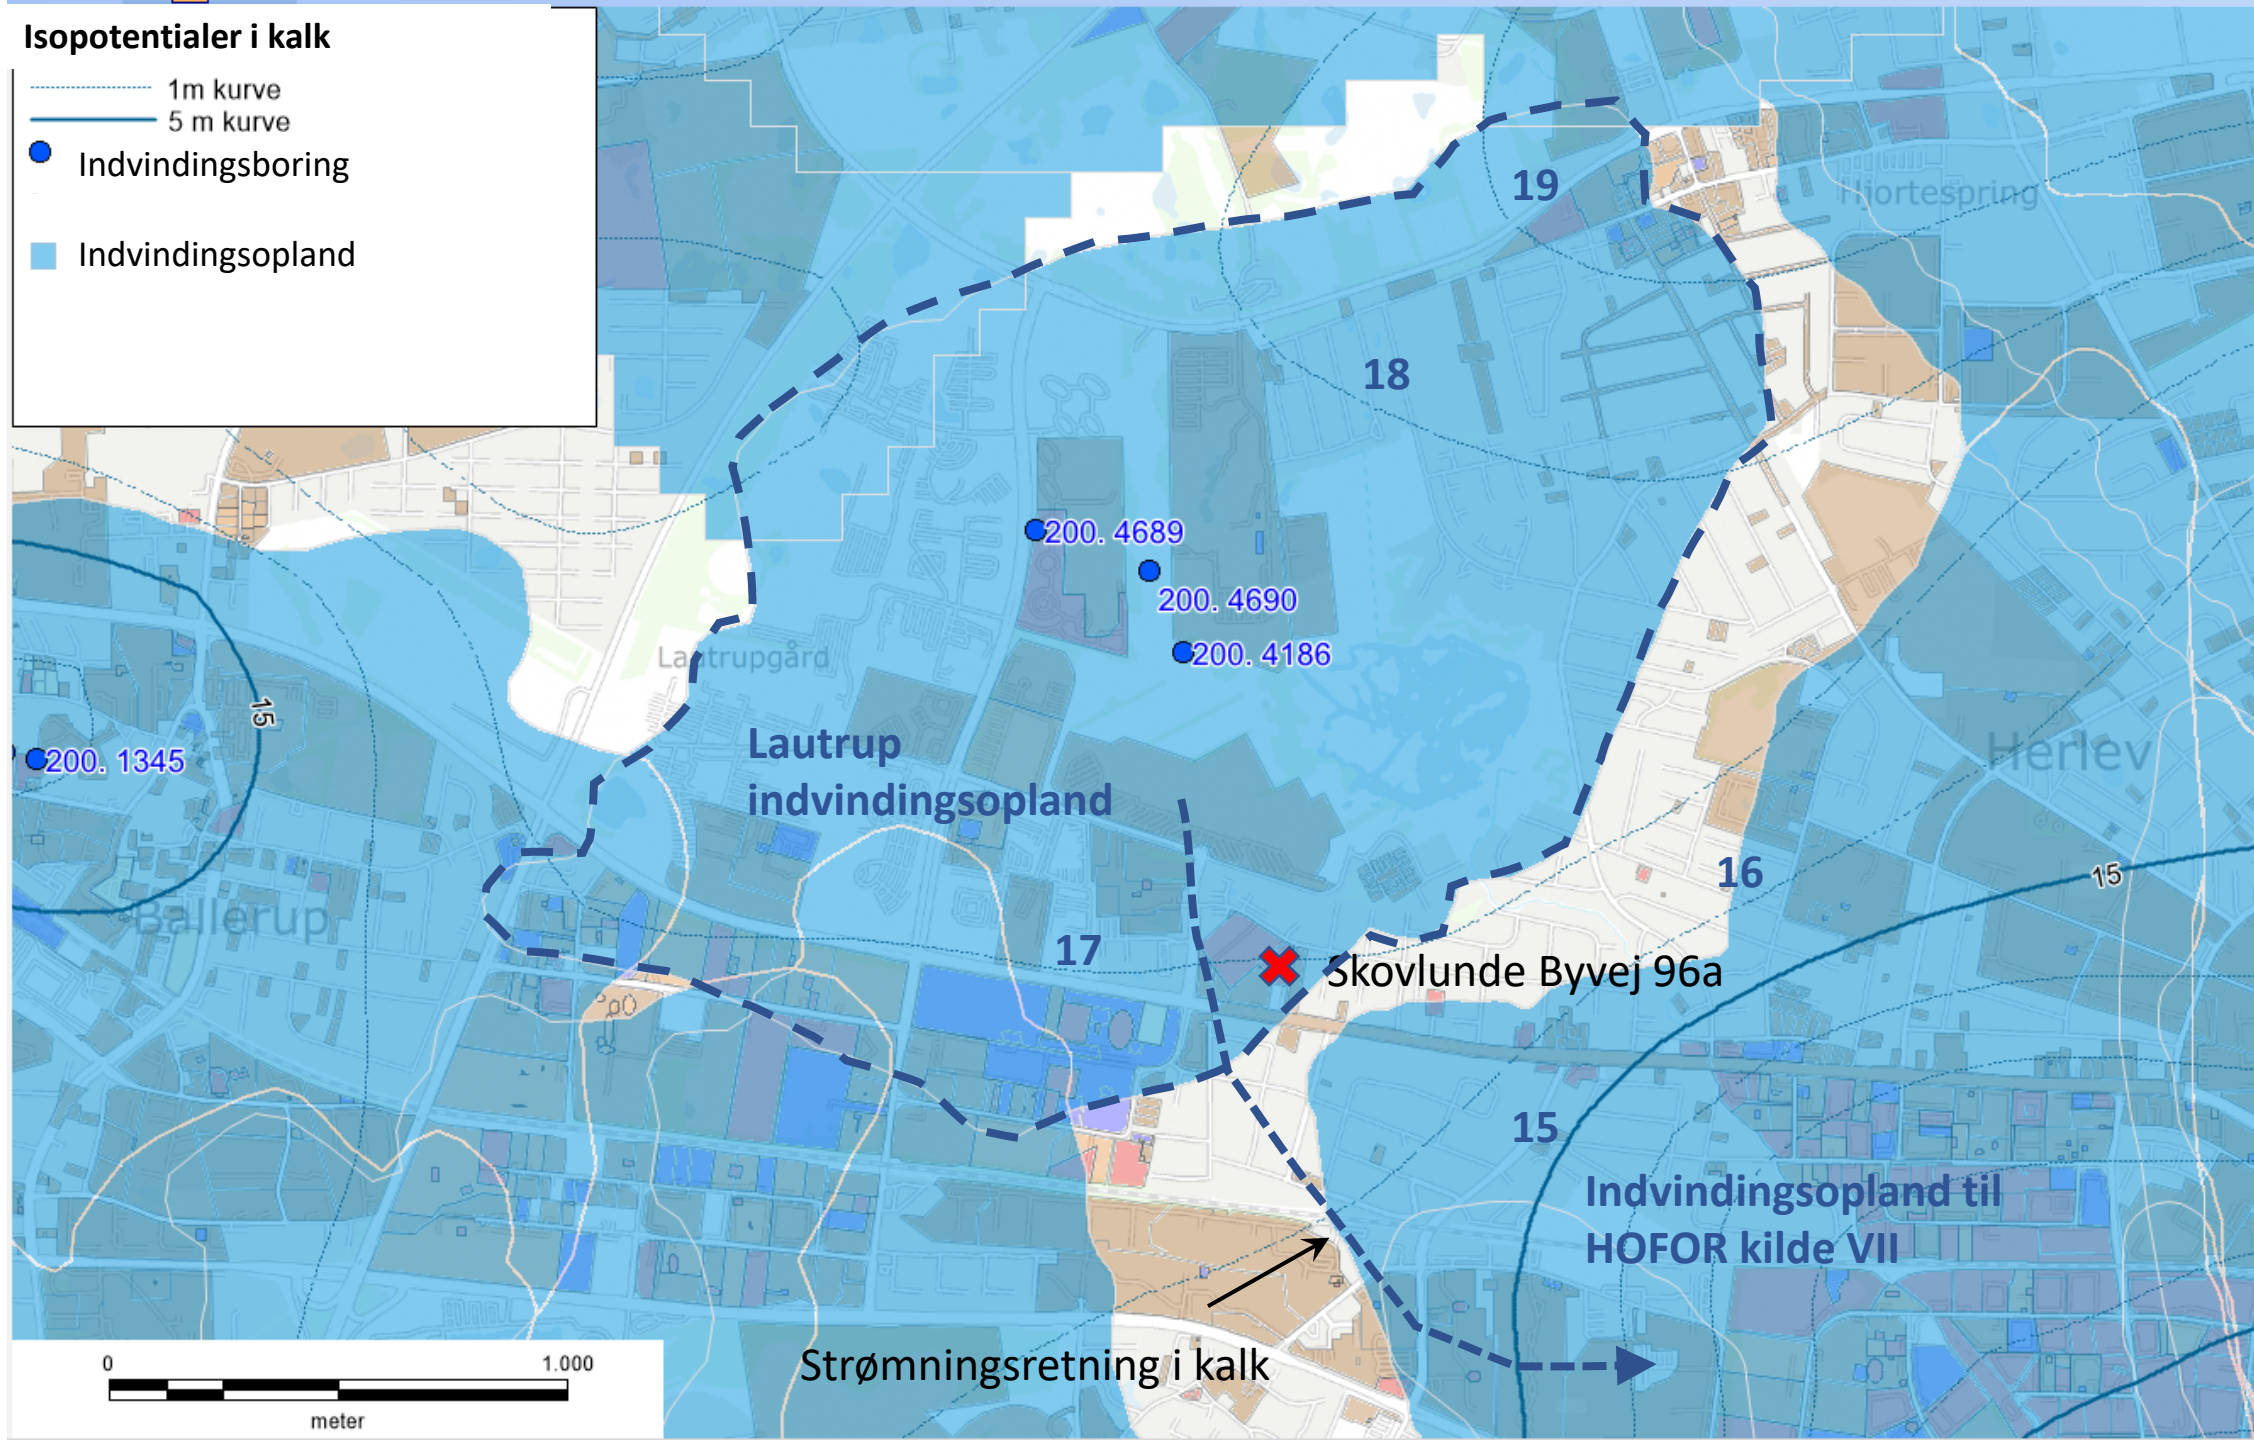

Boringer mm

Vandprøver og
hydrogeologi mm

Isopotentialer i kalk

- 1m kurve
- 5 m kurve
- Indvindingsboring
- Indvindingsopland

Skovlunde Byvej 96A

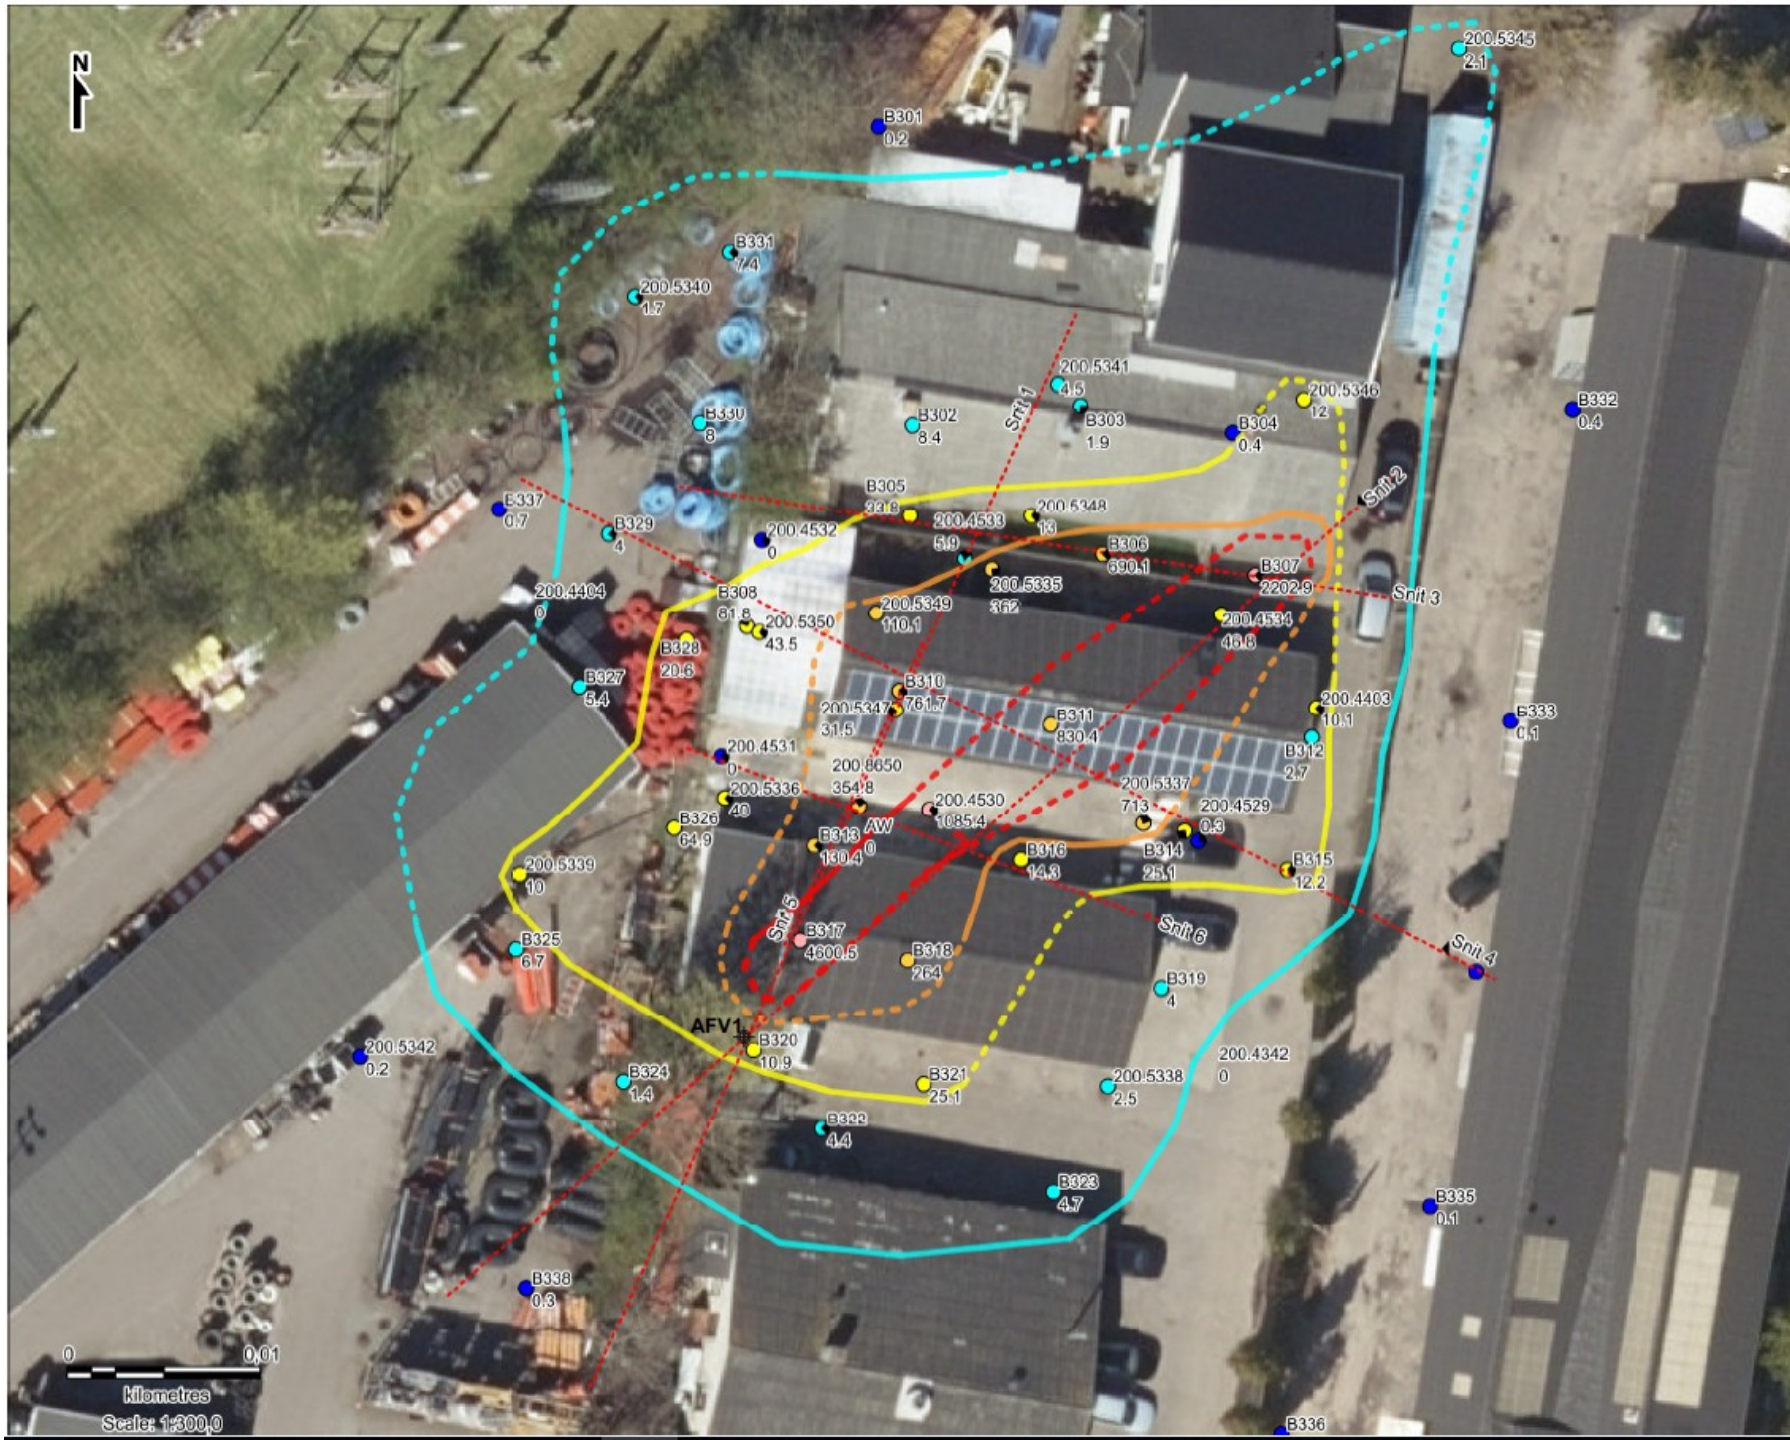

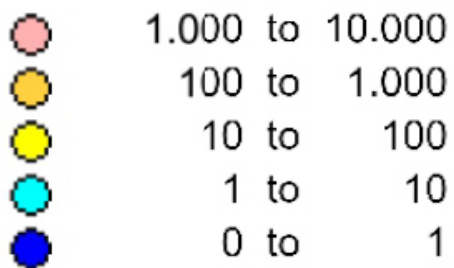

- Renseri fra 1960-1987
- Kraftig forurening med chlorerede opløsningsmidler

Jordforurening

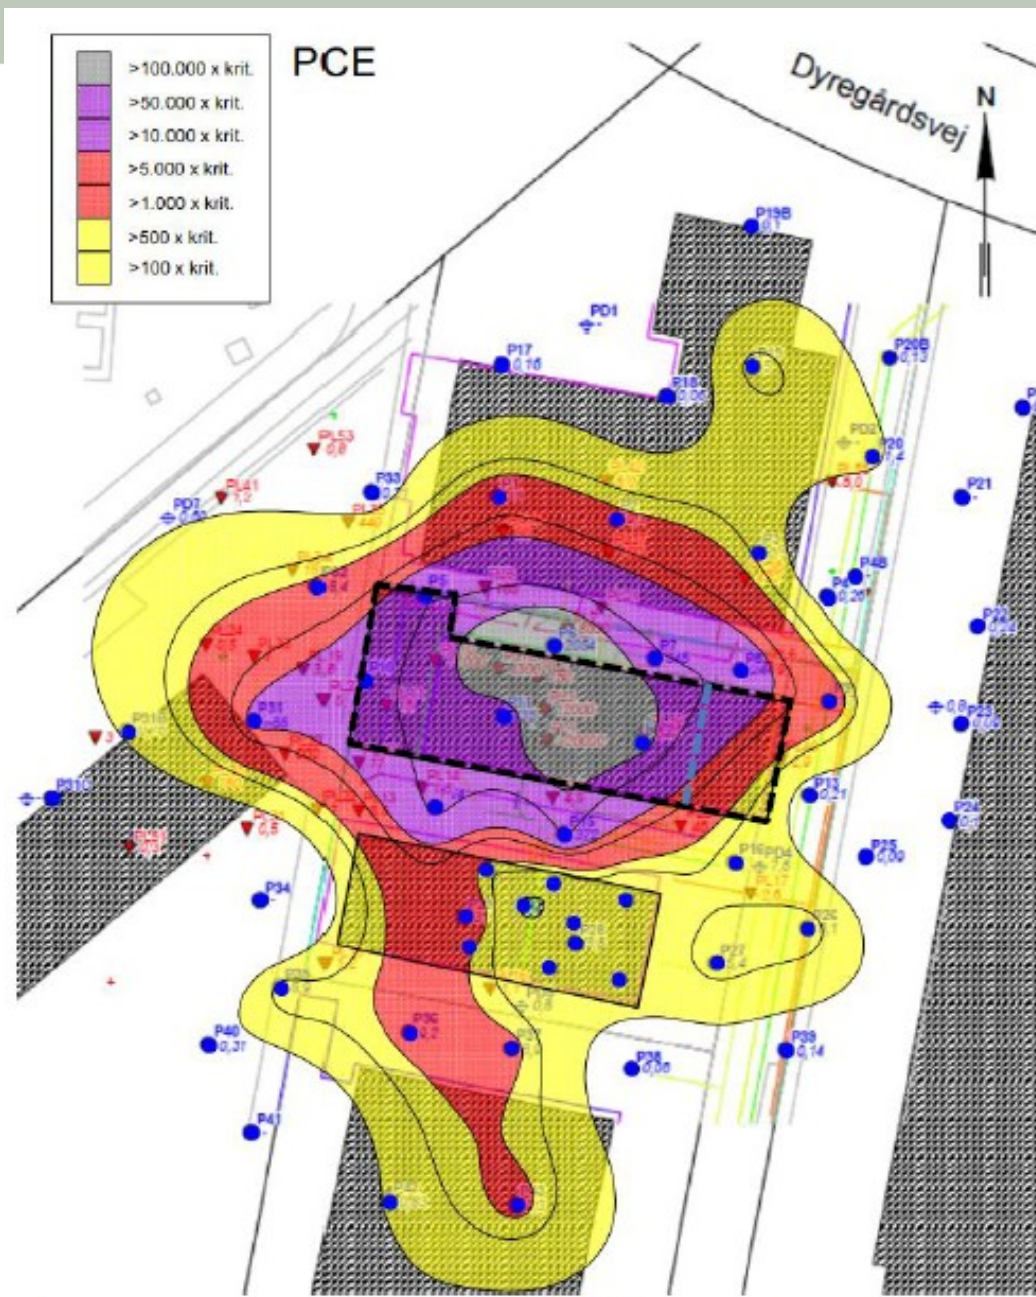

----- Geologisk profil
 ⚓ Afværgéboring

PCE i jord
 Max koncentration (mg/kg TS)

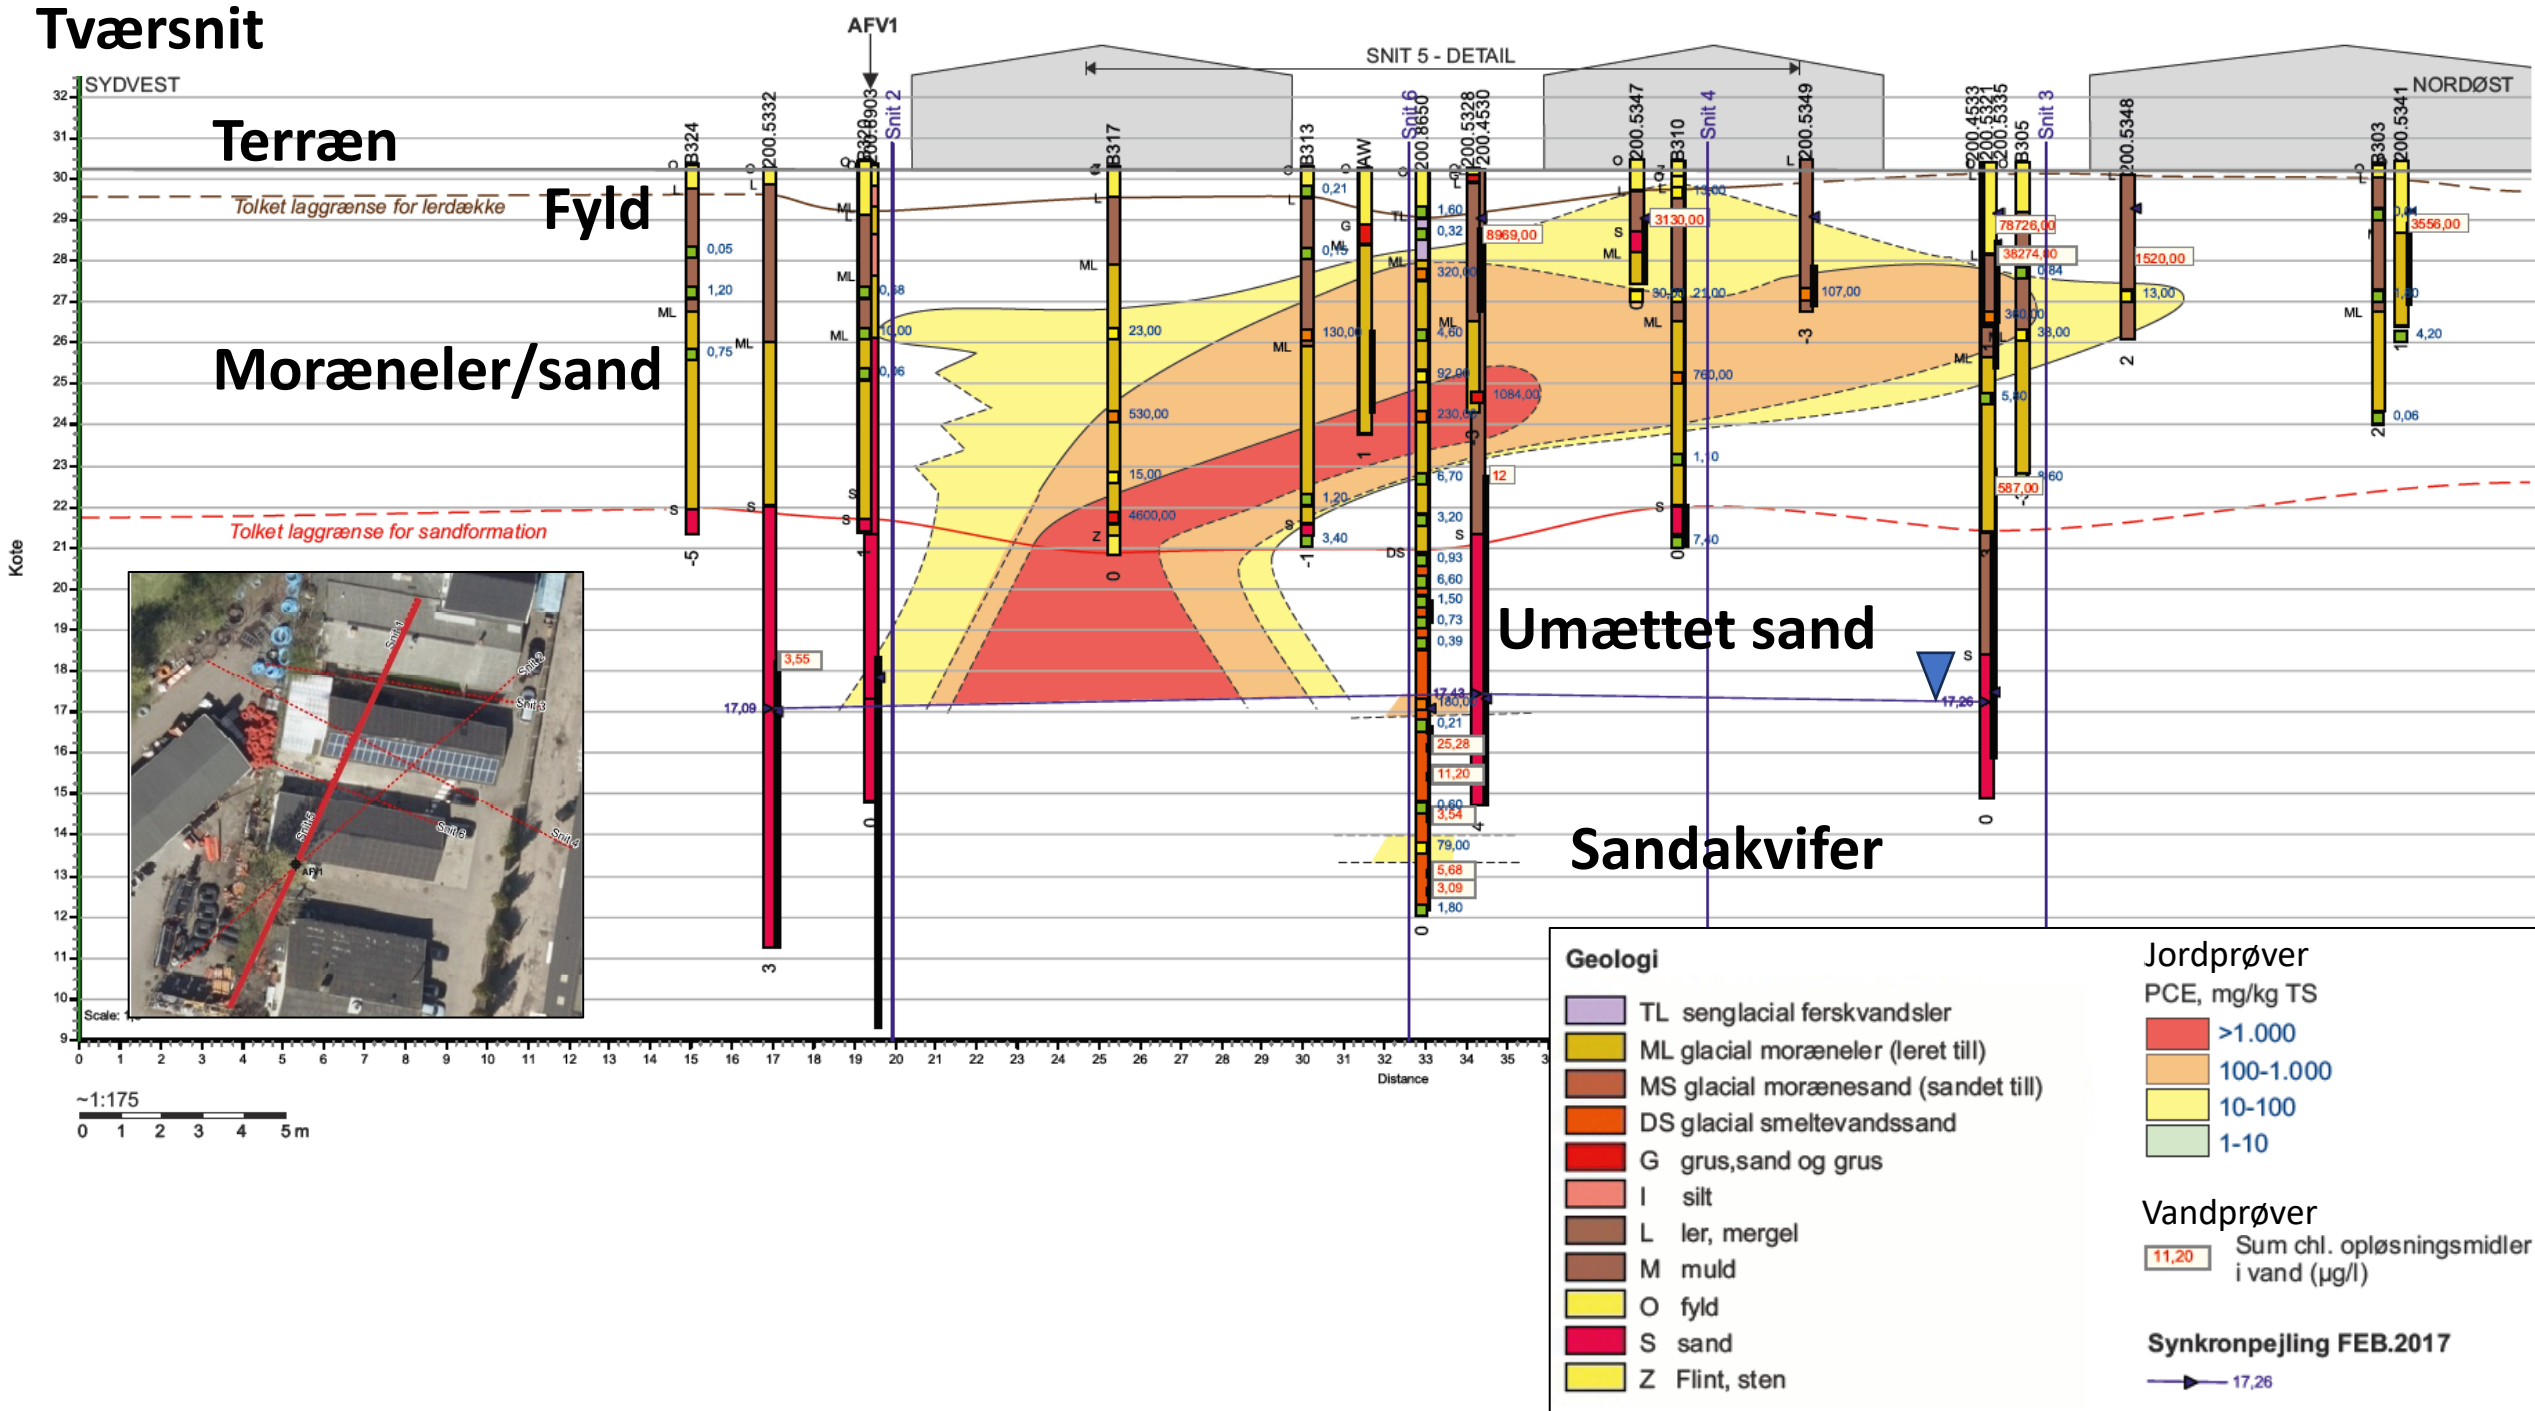

2018

Poreluft

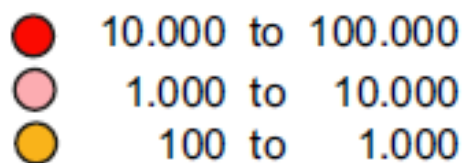

Tværsnit

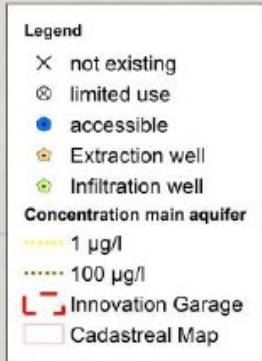

Koncentrationer i vandlommer i moræneler/sand

----- Geologisk tværsnit
✦ Afværgeboring

Sum af chlorerede opløsningsmidler i vand ($\mu\text{g/L}$)

Forurening i sandakvifer

6181100

6181000

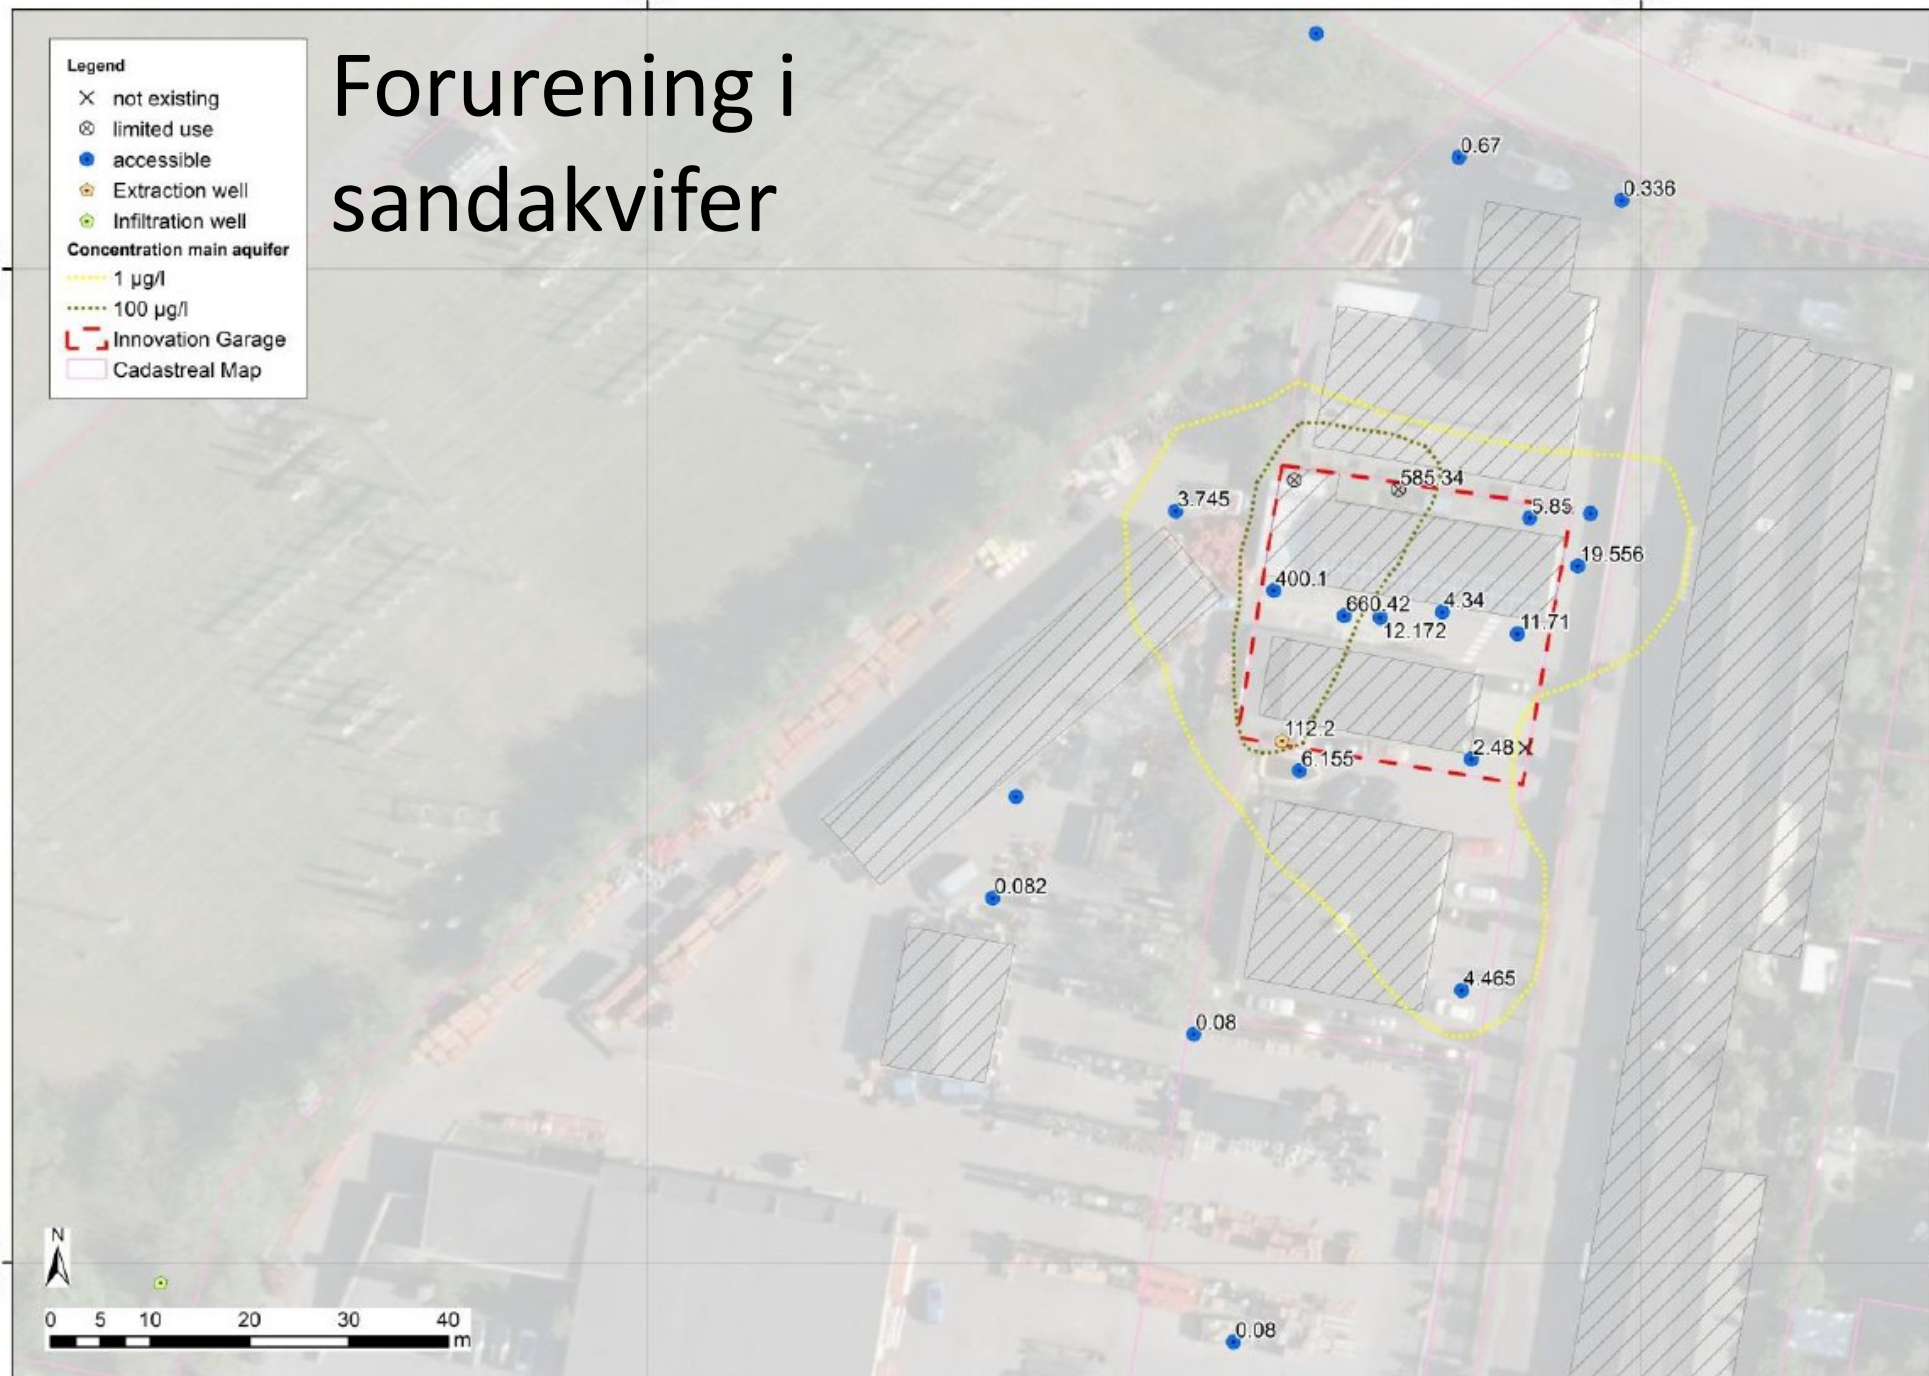

713400

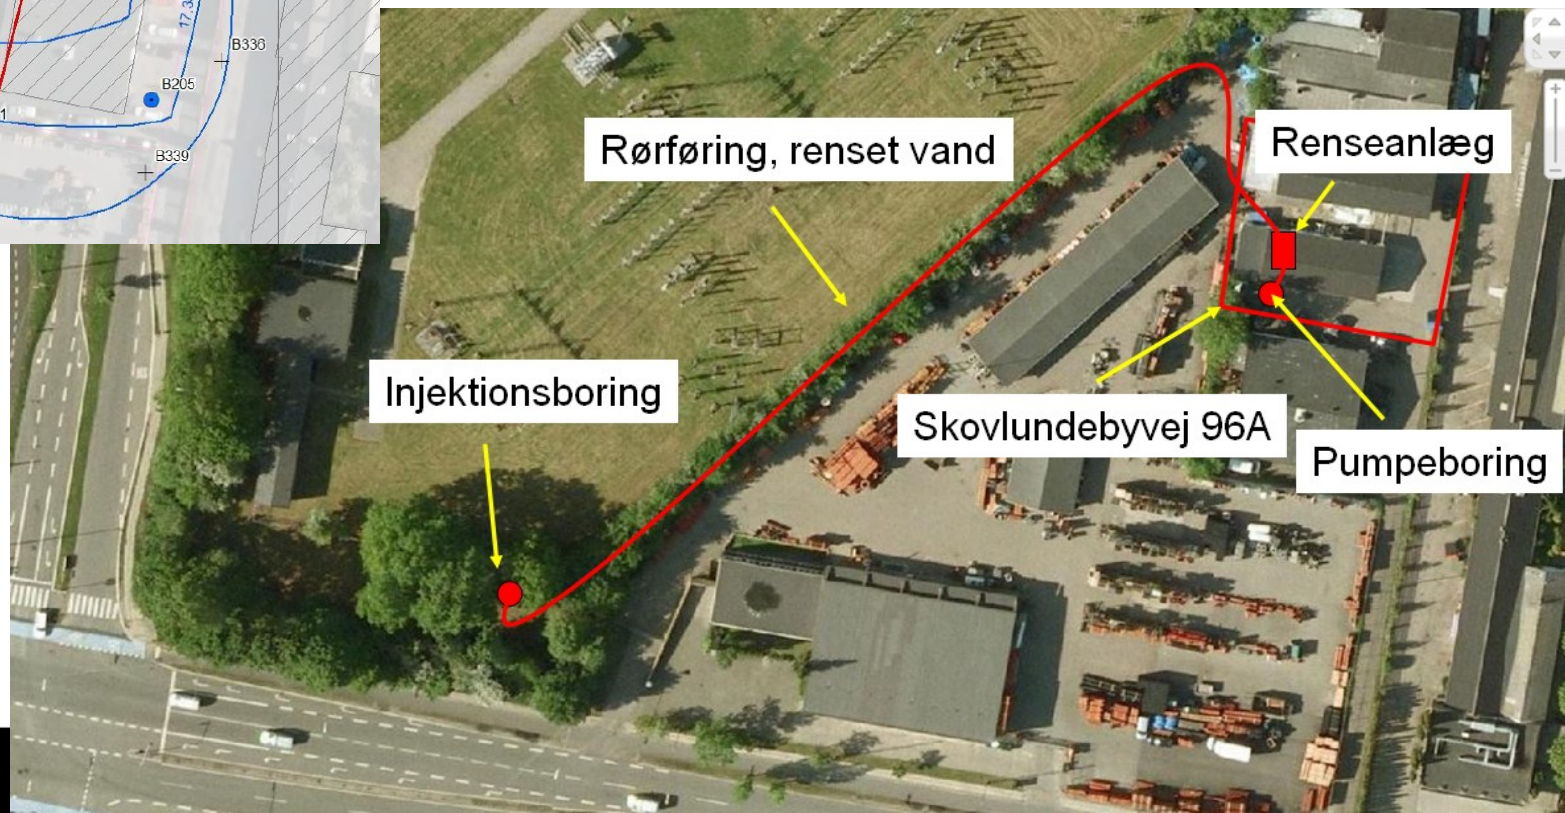

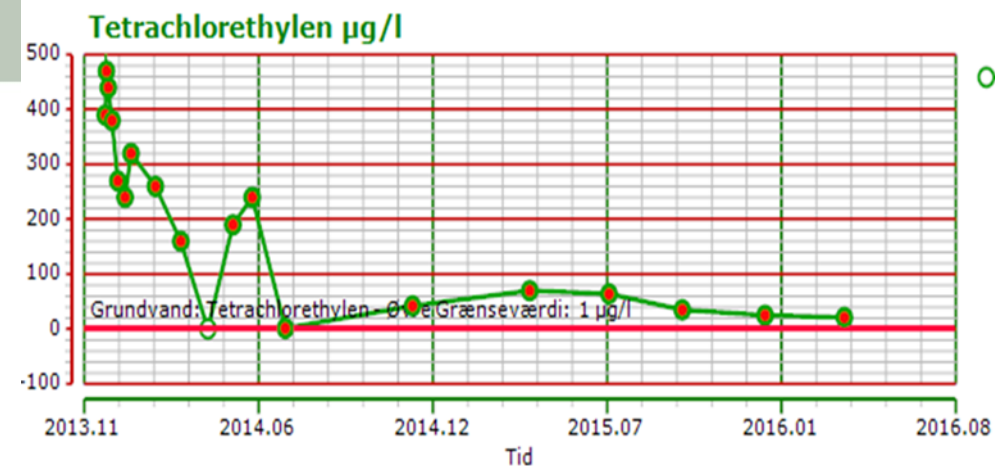

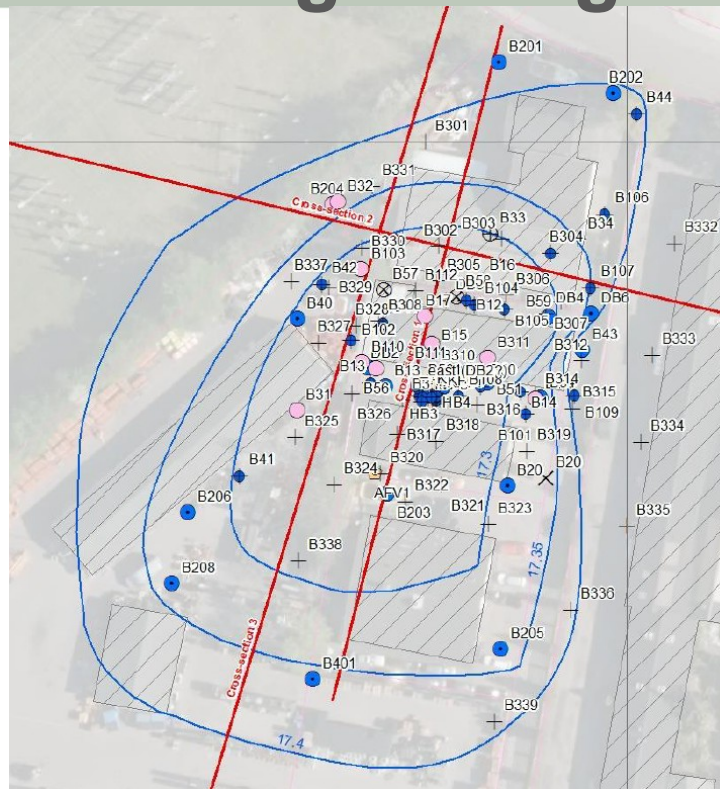

713500

6181100

6181000

Afværgeanlæg

En Region Hovedstaden testgrund

- "Living lab" og udstillingsvindue
- Ingen grundejerhensyn
- Infrastruktur
- Stor baggrundsviden

Danish Soil
Partnership
